

Oi! I am Nina, a Brazilian Northeast Illustrator, from the countryside of Bahia, currently living in Toronto, Canada, a big and super cold city. I am a self-taught artist with almost 10 years of experience so far, 4 years as a mixed media art teacher, and a Children's Book Illustrator since 2021. I have a strong traditional art background and I show that on my digital work with the different textures and coloured palettes, especially when I am drawing the natural environment and whimsical world. I aim to bring joy to children through art and inspire future illustrators, just as I was inspired by the books of my childhood. When I am not working, you can find me watching silly movies, reading a book or playing board games with my friends.
